The Canadian Academy of Child and Adolescent Psychiatry (CACAP) and the Journal of the Canadian Academy of Child and Adolescent Psychiatry (JCACAP) are committed to upholding the principles of academic freedom and open scholarly discourse. In accordance with these principles, JCACAP may publish content reflecting a range of perspectives, including those that are controversial, preliminary, or subject to ongoing debate. Acceptance for publication reflects an editorial judgment that the content meets the journal's standards for scholarly rigour, relevance, and peer review.

Publication of any article, editorial, or other content in JCACAP does not constitute agreement or endorsement by CACAP, JCACAP, its editors, editorial board, or affiliated institutions of the views, claims, methods, or conclusions expressed therein. All opinions remain solely those of the individual author(s).

Readers, including clinicians, researchers, and members of the public, are responsible for independently evaluating all published content in light of the current scientific, clinical, and professional literature, and should not rely on any single article as a sole basis for clinical or policy decisions.

CACAP and JCACAP disclaim any liability for actions taken or decisions made in reliance on, or otherwise arising from, published content, including opinions expressed therein. CACAP and JCACAP are not responsible for interpretations, opinions, or characterizations expressed by authors, which reflect the views of the individual author(s) alone.
